SWRCB	State Water Resources Control Board
WDRs	Statewide General Waste Discharge Requirements

## DEFINITIONS

**Geographical Information System (GIS)** – A database linked with mapping, which includes various layers of information used by government officials. Examples of information found on a GIS can include a sewer map; sewer features such as pipe location, diameter, length, material, condition, last date cleaned or repaired. The GIS also typically contains base information such as streets and parcels.

**Infiltration/Inflow (I/I)** – Infiltration is generally considered to be extraneous water that enters the sewer system over longer periods of time, such as groundwater seepage through cracks in the sewer. Inflow is generally considered to be extraneous water that enters the system as a direct result of a rain event, such as through defects in the sewer. While it is impossible to control all I/I, it is certainly desirable to reduce I/I when cost-effective.

**Lateral** – The portion of sewer that connects a home or business with the main line in the street.

**Stoppage** – A build up of debris in the sewer, which stops the flow of wastewater and allows the water to back up behind the stoppage, sometimes causing an overflow. Also called blockage.

**Blockage** – A build up of debris in the sewer, which stops the flow of wastewater and allows the water to back up behind the stoppage, sometimes causing an overflow. Also called a stoppage.

**Wastewater Collection System** – All pipelines, pump stations, and other facilities upstream of the headworks of the wastewater treatment plant that transport wastewater from its source to the wastewater treatment plant.

# **CITY OF SAN DIMAS**

## **SEWER SYSTEM MANAGEMENT PLAN (SSMP)**

### **INTRODUCTION**

On May 2, 2006 the State Water Resources Control Board (SWRCB) adopted a Statewide General Waste Discharge Requirements and Monitoring and Reporting Program (WDRs), for sanitary sewer systems by issuing Order No. 2006-003 (Appendix A). The regulations in the Order were in response to growing public concern about the water quality impacts of Sanitary Sewer Overflows (SSOs), particularly those that cause beach closures, adverse effects to other bodies of water, or pose serious health and safety or nuisance problems.

Two major components of the WDRs require the following:

- (1) The requirements that owners/operators of publicly owned Sewer Collection Systems, a mile long or greater, must apply for coverage under the WDRs; and,
- (2) The owners/operators must develop and implement a System Management Plan (SSMP) specific to the sanitary sewer system.

In compliance with the first component, the City of San Dimas (City) filed a Notice of Intent (NOI) application form with the SWRCB on October 30, 2006. The City subsequently received a Username and Password for electronic access to the California Integrated Water Quality System (CIWQS) database. Within the database-reporting program, the City completed a "collection system questionnaire" and will file all subsequent updates and all required SSO reporting.

In compliance with the second component, this document was prepared to meet the objectives contained in the WDR Order. Since the Consolidated Sewer Maintenance District (CSMD) of the Los Angeles County Sewer Maintenance Districts (SMD), provides operation and maintenance services for the City's sewer facilities, some components of the City's SSMP are the same as those of the SMD's. This document is divided into 12 chapters, which closely align with the respective provisions contained in the WDR's. Every section or subsection of each chapter addresses one of the key elements of the SSMP directive.

This document, with other existing Agency Programs referenced herein, constitute the City's SSMP. By implementing the procedures contained in this SSMP, the occurrence of SSOs should decrease or possibly be avoided throughout the City's Sanitary Sewer Collection System.

## 1.0 GOALS AND ACTIONS

1.1 The goals of this SSMP are to ensure the following:

1. The City's sanitary sewer collection system is properly operated, maintained and managed to reduce frequency and severity of sanitary sewer overflows (SSOs) and their potential impacts on public health, safety, and the environment.
2. When an SSO occurs, prompt action is taken to identify, contain, and remove the cause; report the event to the appropriate regulatory authorities; and notify the public in a timely manner,
3. All SSOs, system deficiencies, and remedial actions taken are well documented, or
4. The City's sewer system operators, employees, contractors, responders, and other agents are adequately trained and equipped to address an SSO event.
5. The City's sewer system is designed, constructed and funded to provide adequate capacity to convey base flows and peak flows, while meeting or exceeding applicable regulations, laws and the generally accepted practices relative to sanitary sewer system operation and maintenance.

1.2 The actions to be taken to satisfy the SSMP are as follows:

1. Conduct a planned and scheduled maintenance program to minimize the risk and occurrence of SSOs.
2. When an SSO occurs, respond to the incident in a timely manner and undertake feasible remedial actions to contain the overflow, including stopping the flow from reaching the storm drain, if possible.
3. Stop the sewer overflow as soon as possible and limit public access to the overflow area to prevent public contact with any wastewater contamination.
4. If possible, completely recover the overflow sewage, return it to the sewer system, and clean up the contaminated area.
5. Gather and compile all pertinent information regarding the sewer overflow incident, investigate as necessary to determine probable cause, document findings, report the incident to the appropriate regulatory agencies in a timely manner, and file a copy of the report.

## **2.0 DESCRIPTION OF THE ORGANIZATION**

### **2.1 Management**

The City serves a population of approximately 37,000 people. The City's Public Works Department (PWD) manages the City's sanitary sewer collection system. All of the City's sewer system is maintained by the Los Angeles County Sewer Maintenance District and is maintained by funds accumulated in the district for service of these lines. The total amount accumulated for the servicing of the lines is approximately \$40.50 for each sewage unit (equates to single family household) per year. There are approximately 10,000 parcels within the City of San Dimas equating to approximately \$400,000 in fees accumulated over the year. These monies are used for maintenance and replacement of the existing sewer lines. The collection system consists of about 100 miles of gravity sewer lines and 7 pump stations. The City's local sewers discharge into the County Sanitation District facilities for conveyance, treatment and disposal.

The City has 3 budgeted management positions directly involved in sewer system responsibilities. The field operation and maintenance services are fulfilled by utilizing the services provided by the CSMD managed by the Los Angeles County Department of Public Works (County DPW). The distribution of the City's personnel and the contracted services are depicted in the organization chart presented in Section 2.3.1a of this plan. These personnel, in collaboration with County DPW personnel, administer the City's sewer collection system operation, provide engineering evaluation of proposed and existing sewer facilities, administer preventive maintenance and sewer construction programs, and oversee the maintenance of the sewer collection system facilities and related records and plans.

### **2.2 Authorized Representative**

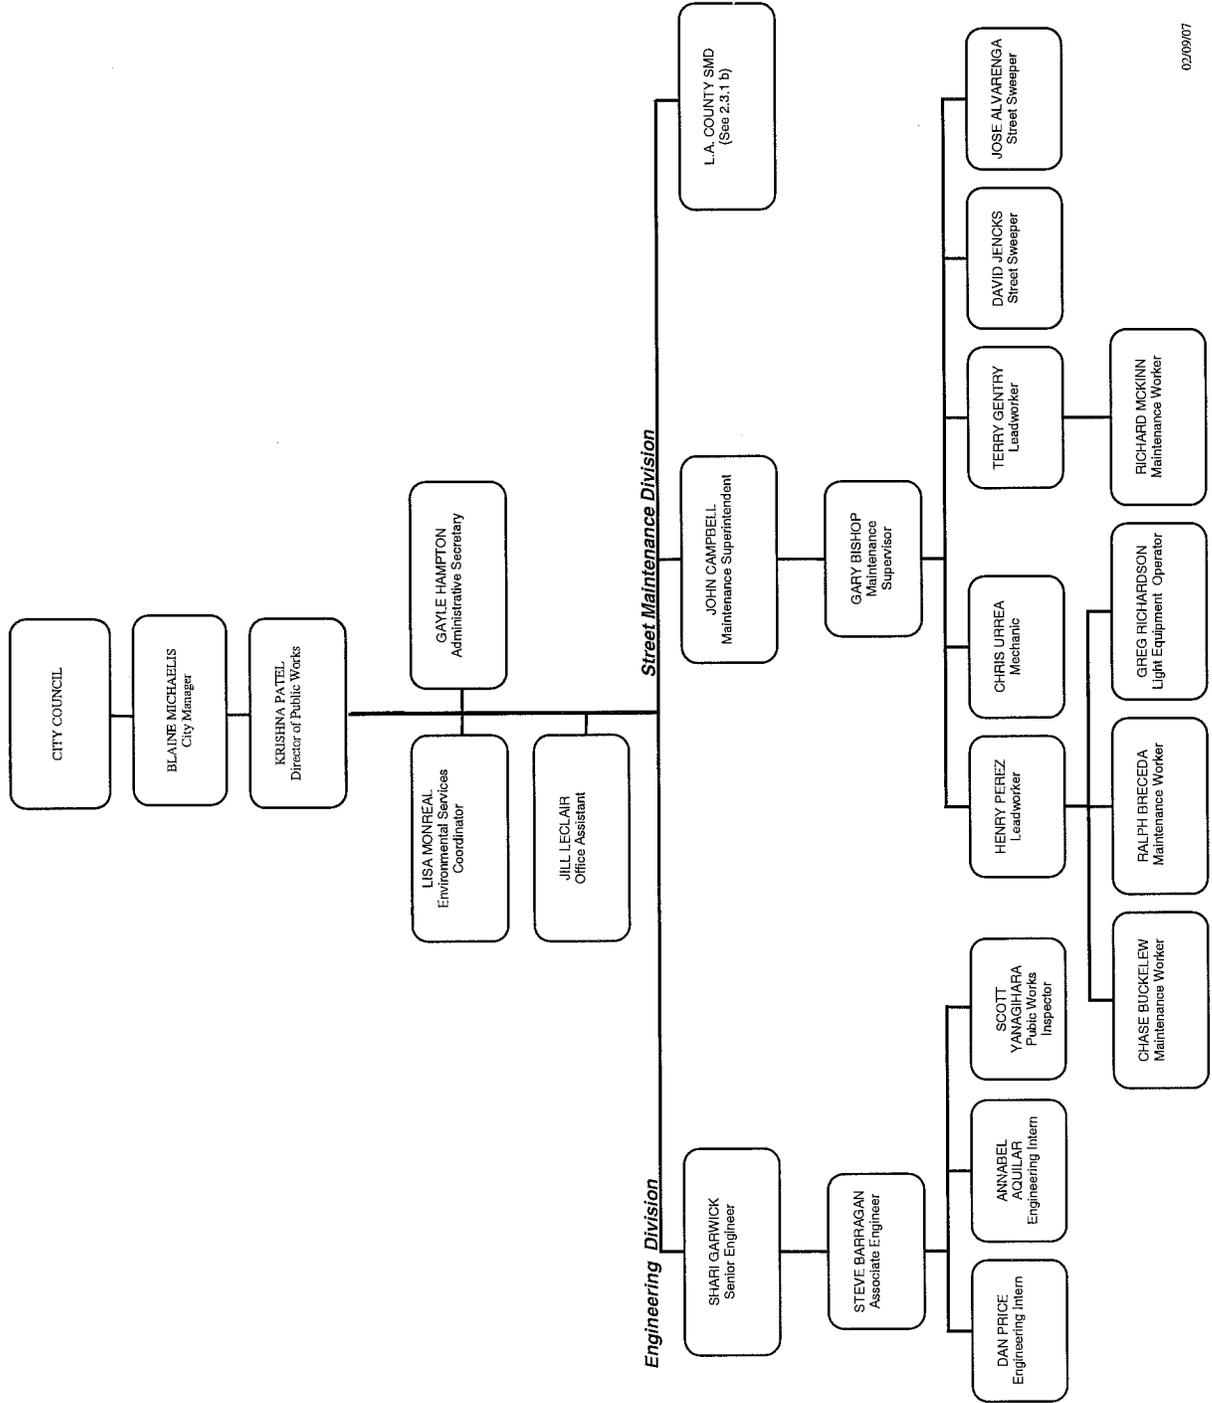

The City's Director of Public Works in concert with designated County DPW staff, are the authorized representatives who are responsible for the execution of compliance actions required under the WDRs. This includes, but is not limited to, execution and certification of all reports and correspondence as required under the Order.

### **2.3 Organization Chart and Responsibilities**

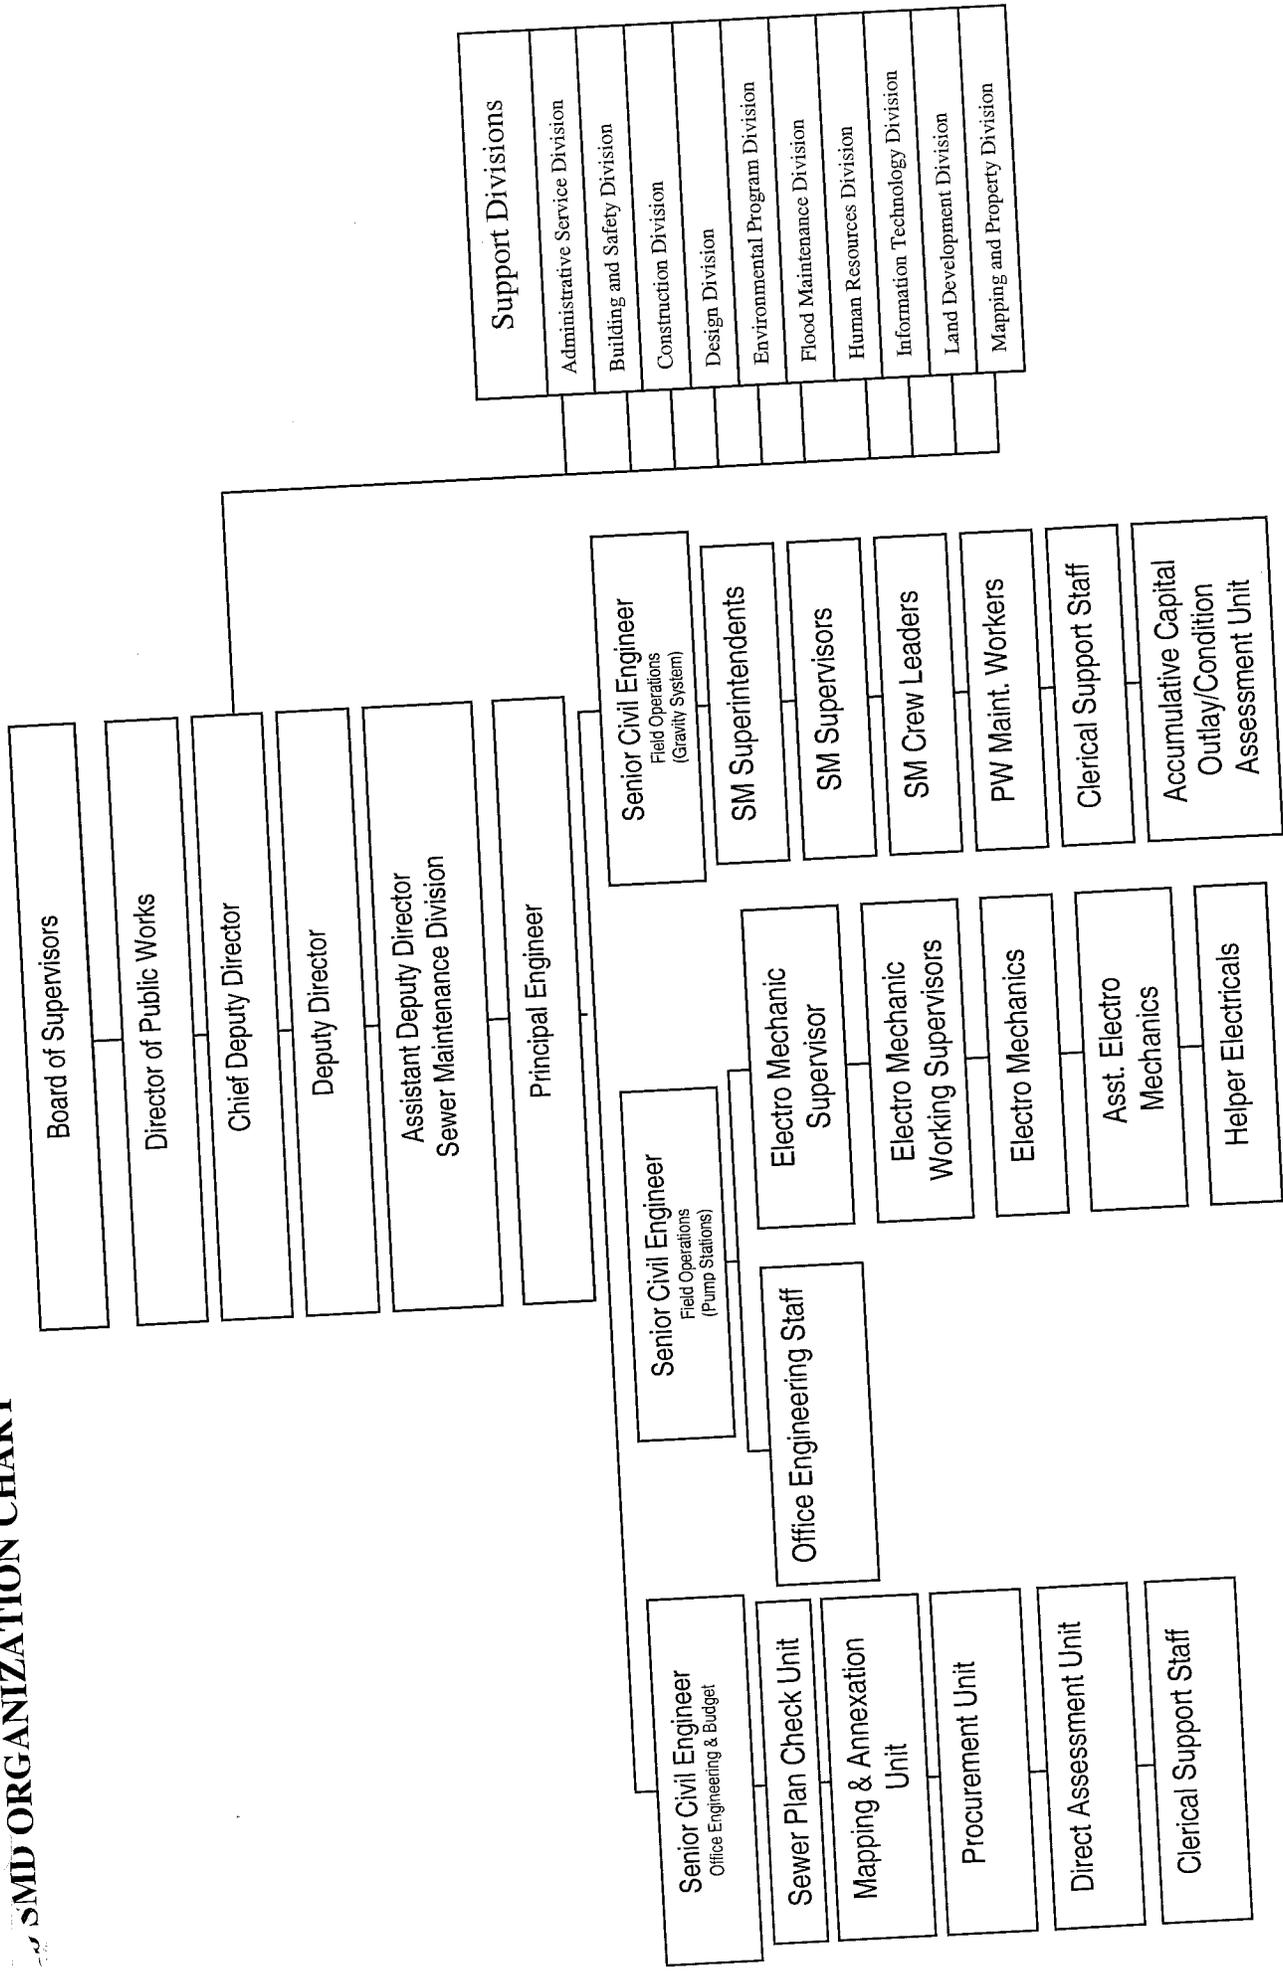

The organization chart, showing the structure and relationship of the City and the County DPW administrative, management and field positions relative to Sewer Operation and Maintenance (SO&M) is presented in Sections, 2.3.1a and 2.3.1b respectively and the descriptions of responsibilities and support are presented in Sections 2.3.2 and 2.3.3.

2.3.1a City of San Dimas Organization Chart for Sanitary Sewer System Management

# CITY OF SAN DIMAS - DEPT. OF PUBLIC WORKS

# SMD ORGANIZATION CHART

### **2.3.2 Description of Responsibilities - The description of responsibilities or roles of each position especially as related to SSOs are as follows:**

- City Council - Responsible for establishing new and amending existing ordinances and policies governing the municipal operations, and the operations of the City's sanitary sewer system including the approving of all SO&M contracts and agreements to protect the community's interest.
- City Manager – Responsible for the overall management and application of all legal and policy directives that relate to the City's activities, including the operation and maintenance of the City's sanitary sewer system.
- Director of Public Works – Directs the accomplishment of statutory and policy criteria within the scope of the City Council's policy and legal requirements. Directs its execution, and evaluates work accomplished within his areas of responsibility, including the SO&M program. Also directs the planning, budgeting, design for the construction of new sewer collection system and rehabilitation of existing sewer collection system. Facilitates all sewer collection system operation and maintenance activities through the contract with LACDPW, as the City's representative on the Consolidated Sewer Maintenance District (CSMD). Responsible for the day-to-day management and operation oversight of the City's sewer collection system, including the seven sewer pump stations. In conjunction with the City Engineer, directs engineering and management activities relating to studies, design, investigations, and the preparation of reports, budget and contractual agreements with private firms for technical services projects. Performs special studies, investigations and reports concerning sewer infrastructure.
- Senior Civil Engineer – Performs a wide range of professional & complex civil engineering work in re-design, construction, and management & maintenance of public works projects; performs other duties as assigned. Has oversight of all contracted maintenance and repair services for City's facilities.
- Street Maintenance Superintendent - Has oversight of in house maintenance and repair services for City's infrastructure. Usually related to emergency spill response and containment until County forces arrive. Assists as required to contain and clean SSO's.
- Office Administrative and Clerical Assistants - Assist in the preparation of reports, budgets, and other correspondence; coordinate and facilitate of City and contract personnel in addressing local citizen issues relative to sewer service.

**2.3.3 City Divisions/Departments and Other Agencies** - Other Divisions or Departments within the City, and specific contracted services, are currently and will continue to be responsible for carrying out some of the compliance actions called for by the WDR's for the City. The key support units and their responsibilities are described below:

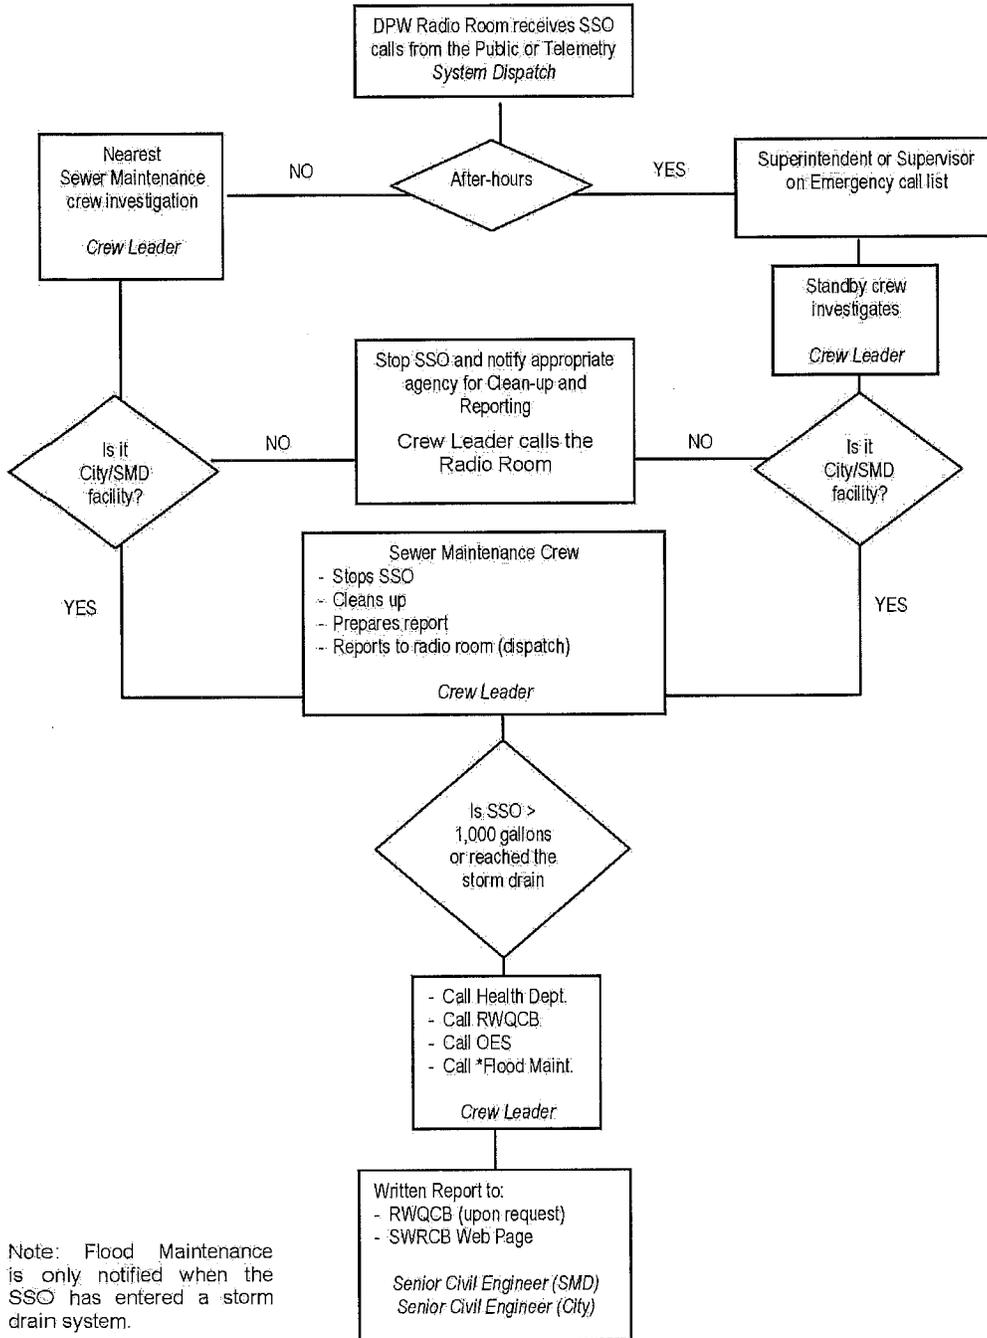

- Administrative Services Department - Responsible for procuring equipment and as needed contract services for emergency sewer repair projects, printing and mailing of public education outreach program materials, and for procuring material and supplies needed for the day to day operation and maintenance activities, accounting services and training of personnel. Also responsible for investigating SSOs related claims and litigations against the city.
- Building and Safety Division - Responsible for reviewing various building permit applications, their relationship to public easements and facilities, and issuing permits for sewer connections. Also the enforcement of the Plumbing Codes involving proper connection and discharge into the public sewer system and the property owner's maintenance of their respective sewer laterals between the structure served and the public sewer collection main.
- Code Enforcement Division – Responsible for the enforcement of the Health and Safety Codes regarding waste disposal such as the FOG program, point source control inspection of industrial and commercial waste and grease generating facilities, and investigation of cases of illicit discharge of chemicals, debris, etc. into the public sewer system. This is undertaken in concert with the LAC DPW Environmental Programs Industrial Waste Unit.
- Engineering Division - Responsible for preparing plans and specifications for sewer construction and rehabilitation projects, and the administration of contracts for accomplishing such projects and emergency sewer repair projects. Also responsible for subdivision or development project plan checks to ensure compliance with the City's standards for construction of new sewer collection systems. Plan checks sewer capacity studies to size proposed sewer lines and sets requirements to ensure adequate capacity in existing systems. Prepares easement documents or identifies and procures access rights for public sewer facilities located within private properties.
- LAC DPW - The Sewer Maintenance and the Environmental Programs Divisions provide critical services needed for the City to address the required demands of the WDR. The Sewer Maintenance Division is responsible for operational maintenance services of the city's sewer collection system, including cleaning, closed circuit television (CCTV)

inspection, manhole inspection, and minor urgency repairs. The Environmental Programs division is responsible for the implementing the City's industrial waste and FOG programs, which include permitting, inspection and enforcement of illicit discharges to the public sewer system in concert with Code Enforcement Division.

- Los Angeles County Fire Department – Responsible for assisting with protecting the public in the event of an SSO that expands into high use public travel ways and/or those that reach storm drains or water courses and spread the effect of public risk to health and safety impacts.
- Los Angeles County Sheriff's Department - Responsible for operating the Emergency Operation Center for the entire City including handling after-hours service calls reporting SSOs, and pump station malfunction calls and forwarding those reports to the LACDPW.

**2.3.4 Chain of Communication for SSO Reporting** - The chain of communication for reporting SSOs, from receipt of a complaint or other reliable information source to reporting to the appropriate regulatory agencies, is presented in Section 2.3.4a below. The city's contact directory for communicating with both internal and external parties involved in responding and reporting an SSO event is shown in Section 2.3.5. The SSO emergency response plan will be discussed in greater detail in Chapter 6 of this document.

### 2.3.4a City's SSO Reporting Procedures Flow Chart

\* Note: Flood Maintenance is only notified when the SSO has entered a storm drain system.

### 3.0 LEGAL AUTHORITY

#### 3.1 Legal Authority

The City's legal authority to own and operate a sanitary sewer system is derived from its incorporation as a City. The City on October 9, 1961 through Resolution 61-91, granted the County of Los Angeles the consent and jurisdiction to annex sewered portions of the City into the CSMD. By that action, the City has entrusted the management, operation, and maintenance of its local sanitary sewer system to the CSMD. The City, however, still maintains full ownership of the sewer system.

In compliance with the WDR, this Chapter highlights the City's legal authority to: 1) prevent illicit discharges into the sanitary sewer system; 2) require that sewers and connections be properly designed and constructed; 3) ensure access for maintenance, inspection, or repairs; 4) limit the discharges of FOG and other debris that may cause blockage; and 5) enforce any violation of sewer ordinances or City Municipal Codes (CMC). The legal authorities for the specific areas stipulated in the WDRs are covered in various sections of the City Municipal code and Chapters 20.20, 20.24, 20.22, 20.32, 20.36, and 20.40 of the LACO Code some of which are discussed below:

**3.1.1 Legal Authority to Prevent Illicit Discharges into the Sanitary Sewer System** - In accordance with the City's Municipal Code, Chapter 15, Section 048, the City has adopted the 2007 Edition of the California Plumbing Code. Per Chapter 14, Section 08 of the CMC, the City has also adopted the 1990 Edition of Title 20 – Utilities of the Los Angeles County (LACO) Code, which regulates sanitary sewers and industrial waste in the County, as its Sanitary Sewer and Industrial Waste use Ordinance. All references to County positions shall be construed to the applicable City or County position charged with enforcement of that task.

The California Plumbing Code Title 24 Part 5, Section 714.2 prohibits the unauthorized discharge of rain, surface or subsurface water (inflows) into the collection system. LACO Code – Title 20, Section 20.36.010, prohibits the illegal dumping of offensive or damaging substances such as chemicals, debris, etc. Other Sections of the code that prohibit various forms of illicit discharges are 20.24.020, 20.24.200, 20.32.080, 20.32.650, etc. The California Plumbing Code Title 24 Part 5, Section 714.1 also prohibits various forms of illicit discharges that could cause damage to the public sewer system.

The City, as one of the CSMD cities, benefits from the districts Infiltration/Inflow (I/I) control program. This program consists of sewer line cleaning and maintenance program, which includes closed circuit television (CCTV) and other mechanisms to detect I/I. By ordinance LACO Title 20, Section 20.40.045, the Los Angeles County Board of Supervisors has established a financial plan to ensure capital replacement or rehabilitation of sewer lines prone to I/I within the

CSMD. The LACO Title 20, Section 20.24.080, requires that property owners be responsible for maintenance of their house laterals, including the elimination of cracks, tree roots, and other debris. These laws combined constitute the City's legal authority to prevent illicit discharges into the sewer system.

**3.1.2 Legal Authority to Require that Sewers and Connections be properly Designed and Constructed** - The LACO Code Title 20, Sections 20.32.330 and 20.32.340 as adopted by the City, require that the design of new main-line sewers and pumping plants respectively in the City, comply with Part 3 of Chapter 20.32 of the Code. Section 20.32.350 of the Code requires that the design of new house laterals also conform to the requirements of Part 3, Chapter 20.32 of the Code unless otherwise covered by the LACO Plumbing Code Title 28. In accordance with LACO Code Title 20, Section 20.32.580, the construction of a collection sewer system is required to conform to all the requirements prescribed by Division 2, of the LACO Code, the Standard Specifications for Public Works Construction ("Green Book") and by the Special Provisions and Standard Plans, all on file in the office of the City Director of Public Works. The inspection of new main-line sewers and pumping plants to ensure proper construction is covered under Section 20.30.590 of the LACO Code and also regulated under the CMC.

**3.1.3 Legal Authority to Ensure Access for Maintenance, Inspection, or Repairs** - The LACO Code – Title 20, Division 2, as adopted by the City gives the City the legal right to set requirements to allow unrestricted maintenance access to the public sewer infrastructure located in private property. In accordance with Section 20.32.430 of the LACO Code, the access is secured through City's enforcement of the requirement for legally recorded sewer easements around all public sewer appurtenances located in private properties. Sewer easements are detailed on the sewer construction plans and are thoroughly reviewed by the City and the County for adequacy in size and accuracy of alignment during the plan check process. Plan checkers take special care to ensure that maintenance crews will have sufficient access for the movement of equipment and materials for both routine and emergency repair or construction work on the system.

**3.1.4 Legal Authority Limiting the Discharge of FOG and other Debris that may cause Blockage** - The City by adopting the California Plumbing Code and the LACO Code - Title 20, has the legal authority to satisfy this element of the WDR. Section 714.1 of the California Plumbing Code prohibits the discharge of FOG and other substances that may, among other things, clog, obstruct, fill, or necessitate frequent repairs, cleaning out or flushing of sewer facilities, in the City's Sewer System. This prohibition is also contained in the LACO Code – Title 20, Section 20.36.400. The LACO Code - Title 20, Section 20.36.560 gives the City Director of Public Works the authority to require the installation of treatment facilities, including grease interceptors, at any facility that generates FOG in the amount that will damage or increase the maintenance costs of the sewer

collection system. The California Plumbing Code section 1009.1 requires the installation of interceptors for grease, oil, sand or other ingredients harmful to the sewer system. Section 1014.1 of the California Plumbing Code lists specific establishments where the installation of grease interceptors are required.

**3.1.5 Legal Authority to Enforce any Violation of Sewer Ordinances** - The LACO Code, Section 20.24.090 gives the City Director of Public Works the legal authority to inspect main-line sewers, sewage pumping plants, interceptors etc., as often as he deems necessary, to ascertain whether such facilities are maintained and operated in accordance with the provisions of Division 2 of the LACO Code.

Under 20.24.100 of the LACO Code, the City Director of Public Works is empowered to enforce all the requirements prescribed in Division 2 – Sanitary Sewers and Industrial Waste of the Code and in accordance with Section 20.24.110 may delegate this authority. The LACO Code, Section 20.24.160 allows criminal penalties for any violations of the Sewer and Industrial Waste Ordinances.

The Codes, standard plans, specifications and other material cited in this Chapter are filed at the Office of the City's Director of Public Works.

## 4.0 OPERATION AND MAINTENANCE PROGRAM

### 4.1 Preventive Maintenance Program

The City is within the CSMD, and therefore depends totally on the CSMD for the operation and maintenance of its collection sewer system. The CSMD's Operation and Maintenance programs applied district-wide and described in details in the SMD SSMP are applicable in the City. The CSMD Maintenance Yard (See Appendix B) located at 2849 S Myrtle Avenue, in the City of Irwindale provides sewer services to the City. However, personnel from the other four sewer maintenance yards also shown in Appendix B, provide after hour services to the City such as Stand-by, callback, and other sewer emergency services. The maintenance equipments utilized within the City are owned by the CSMD. A complete inventory of the CSMD equipments assigned to the East Maintenance Yard is presented in Appendix C.

The City's maintenance programs are funded through levying of an annual sewer service charge currently at \$32.5 per equivalent single-family dwelling unit otherwise called a sewage unit (s.u.). This is included in the \$40.5 per s.u. levied by the CSMD and collected with the annual tax bills of property owners in the City that are within the CSMD. The total annual revenue generated for the various sewer programs through the \$40.5 per s.u. charge is approximately \$400,000. These funds are managed and administered by the County and reviewed and adjusted annually to raise sufficient revenues for the maintenance programs.

The following is a summary of the CSMD preventive maintenance activities implemented by the district within the City:

- 4.1.1 **Sewer Line and Manhole Inspection** – The interior and exterior of manholes are inspected semi-annually for any structural defects, sewage flow condition, presence of vermin or rodents, deleterious industrial waste, odors and any signs of unusual settlement around the manholes and along sewer alignments.
- 4.1.2 **Gas Trap Manholes and Siphons** – On a monthly basis, these facilities are inspected and cleared of any stoppages or flow restrictions.
- 4.1.3 **Drop Manholes** – These facilities are inspected and cleared of stoppages and flow restrictions on variable frequencies based on prior inspection records.
- 4.1.4 **Sewer Line Cleaning** – Sewer lines are cleaned by hydro jet or rodding. Frequency of cleaning is based on inspection records. Sewer lines known to accumulate grease, garbage grinds or sand are put on monthly, quarterly, or semi-annual cleaning schedule and those prone to root growth are periodically rodded or chemically treated.

- 4.1.5 **Vermin and Rodent Control** – Sewers infested by insects are chemically treated. Those infested by rodents are baited.
- 4.1.6 **Sewage Pump Stations** – All pump stations are equipped with telemetry/alarm system and are inspected twice a week. Pumps and motors are lubricated, control mechanism and valves are checked and adjusted as necessary, and equipment is repaired or modified as required.
- 4.1.7 **Work Scheduling** – CSMD work orders within the City are generated and tracked by the LAC DPW's Maintenance Management System (MMS). CSMD field crews activities are recorded in various forms such as service requests, cleaning reports, sewer maintenance daily reports, manhole adjustments, overflow report forms etc. and finally stored in the MMS. The reports are made available to the City upon request.
- 4.1.8 **City Sewer Mapping System** – the City maintains as-built plans of City's sewer facilities. Data on the plans, such as system location and alignment, pipe material, size etc, are also stored in the SMD Computer Aided Design Drafting (CADD) system. Information generated by the CADD is printed on Index Map Sheets stored by LAC DPW, Sewer Maintenance Division, located at 1000 South Fremont Avenue, Alhambra, California. The Index Maps are also kept at the SMD Field Maintenance Yards. The maps are updated, as necessary, to reflect any changes in the system.

## 4.2 Rehabilitation and Replacement Plan

The City's sewer collection systems are in the CSMD, and the City participates in the District's Accumulative Capital Outlay Program. As a result, the City also benefits from the District's Sewer Condition Assessment Program.

- 4.2.1 **Accumulative Capital Outlay Program of the CSMD** - As stated above, the City participates in the ACO program of the CSMD. Property owners within the CSMD are levied an annual charge of \$4.00 per s.u. for sewer collection system rehabilitation and replacements. The \$4.00 per s.u. charge is also a component of the total \$40.5 per s.u. annual sewer service charge collected from property owner's district-wide and collected with property owner's annual Tax Bills. The program is managed and administered by the LAC DPW.

Under the ACO program, any portion of the sewer system found to be structurally deficient through routine inspection, sewer emergency response or the Condition Assessment Program is immediately repaired as an emergency repair project, or documented in a prioritized list of future short and long-term ACO sewer rehabilitation and replacement project. However, LAC DPW would refer portions of the system that have sewer capacity related problems especially hydraulic deficiencies resulting from over development or change in the zoning of any portion of the City to the City for appropriate corrective action. There are

currently no known capacity related SSO problems in the City. A detailed discussion of the CSMD ACO Program is contained in Chapter 4.2.1 of the SMD SSMP.

**4.2.2 Condition Assessment Program** - There are currently about **100** miles of sewer lines and seven pumping stations within the City. The existing City collection sewer facilities are listed in Appendix D. The existing sewer pipes, ranging from 8 to 12 inches in diameter, are predominantly of vitrified clay pipe material. Naturally, as these sewer lines age, structural problems such as cracks, joint separation, root intrusion, etc. will develop. To ensure that these problems are properly mitigated, the WDR requires that the City has a program in place to minimize and correct them and that the program is well funded.

As mentioned earlier in this document, the City is within the CSMD and participates in the CSMD's ACO/Condition Assessment Program. Property owners within the CSMD are assessed an annual fee of \$4.00 per s.u. for sewer system condition assessment. This charge is part of the current annual sewer service charge of \$40.5 per s.u. levied and collected with property owners annual Tax Bills for the CSMD. This charge is reviewed and adjusted annually by the County to raise sufficient funds for the Condition Assessment Program. Under this program, the entire Sewer Collection System within the City will be inspected by Close Circuit Television (CCTV) to assess the condition of the pipes on a ten year cycle basis. The CCTV inspection schedule for the City is presented in Appendix E of this document. The County DPW is responsible for the management and administration of the funds and program.

### **4.3 Equipment Maintenance and Replacement Policy**

The equipment utilized in the maintenance of the City's sewer facilities is owned by the CSMD. The LAC DPW has full responsibility for the maintenance and replacement of these equipment. The LAC DPW Equipment Replacement Policy is described in Chapter 4.3 of the SMD SSMP.

### **4.4 Training for Field Operations Personnel and Contractors**

All personnel needed for the operation and maintenance of the City's sewer system are employed by the LAC DPW. The training of CSMD personnel is a function of the County and not the City. The training methodologies utilized by the County are contained in Chapter 4.4 of the SMD SSMP. The City does not have any formalized training for contractors doing work within the City. However, City's sewer construction projects are awarded to carefully selected contractors with well trained and qualified personnel for any give project. The designed plans and specifications for City's sewer construction projects contain detailed instructions, on City's permitting requirements, standards and policies that must be adhered to by contractors doing work within the City.

## **5.0 DESIGN AND PERFORMANCE PROVISION**

### **5.1 Design and Construction Standards and Specifications**

The City requires that all sewers be designed in accordance with Los Angeles County standards. The County DPW has Standard Plans and Specifications for Construction of Sanitary Sewers and appurtenances to ensure that sewer lines and connections are properly designed and constructed. The County DPW specifications by reference incorporate the Standard Plans and Specifications for Public Works Construction, Special Provisions, and Standard Drawings. In addition County DPW has other publications such as the Private Contract Sanitary Sewer Procedural Manual, Guidelines for the Design of Pump Stations etc. to ensure consistency in the design of collection systems within unincorporated County areas. The City requires that these publications also be followed in the design of sewer system within the City. To further assure that sewer facilities are properly designed and constructed, City requires that plans are designed by licensed engineers and provides thorough review of plans, by City and SMD, prior to approval for construction and inspection of the actual construction work. The SMD plan review is from stand point of maintenance only.

### **5.2 Procedures and Standards for inspection and Testing New and Rehabilitated Collection Sewer Facilities**

The City provides inspection by using internal staff trained on the inspection of new sewer construction projects. The inspection of sewer rehabilitation projects under the ACO program are conducted by County DPW inspectors. City requires that "As-Built" sewer plans of the completed projects be submitted prior to final approval for acceptance of sewer facilities for public use.

In compliance with SMD policy, the City also requires that all newly constructed pumping stations be inspected by experienced SMD staff prior to transferring such facilities to SMD for maintenance.

## **6.0 OVERFLOW EMERGENCY RESPONSE PLAN**

### **6.1 Overflow Response Procedure**

The City, as a member of the CSMD, relies on the services of SMD for sanitary sewer overflows within the City. Therefore, the SMD Overflow Procedure described in Chapter 6, of the SMD SSMP are utilized by the district in the City. Furthermore, the County DPW 24-hour emergency phone number 1-800-675-HELP (4357) is readily available to City staff and residents to use in promptly notifying County DPW staff of SSO events in the City.

**6.1.1 Regulatory Agencies Notification and Time Frame** - The SMD is responsible for reporting of SSOs' to appropriate regulatory agencies for the City. As discussed in Chapter 2, SSOs that occur in the City are reported to the County by telephone or by telemetry at the pump stations. Upon receipt of such call, County Officials follow the notification guidelines contained in Chapter 6 of the SMD SSMP also presented in Section 6.1.1a and 6.1.1b of this document.

### 6.1.1a Regulatory Agencies Notification and Time Frame

SSO Category	Type or Description	Agencies to be Notified	Type of Notification and Timeframe	
			Telephone/Fax	Written Report/*Online Database
1	<p>A. SSO <math>\geq</math> 1,000 gallons</p> <p>B. Results in discharge to drainage channel and/or surface water</p> <p>C. Discharge to a storm drainpipe and not fully captured and returned to the sanitary sewer system</p>	<p>Health Department</p> <p>Flood Maintenance Division</p> <p>RWQCB (Region 4 or 6)</p> <p>OES</p> <p>SWRCB</p>	<p>NA</p> <p>NA</p> <p>Certify that the notification has been made ASAP, but no later than 24 hours after becoming aware of the spill.</p> <p>NA</p> <p><b>Online Initial Report</b> - ASAP but no later than initial 3 business days after we are made aware of it.  <b>Final Online Certified Report</b> - Within 15 calendar days on conclusion of the SSO response and remediation.  <b>Additional Information</b> - Anytime in form of an attachment.</p>	<p>NA</p> <p>As soon as possible, but no later than 2 hours after becoming aware of the spill.</p> <p>As soon as possible, but no later than 2 hours after becoming aware of the spill.</p> <p>As soon as possible, but no later than 2 hours after becoming aware of the spill.</p> <p>As soon as possible, but no later than 2 hours after becoming aware of the spill.</p> <p>As soon as we become aware of the SSO, reporting is possible and can be provided without substantially impeding cleanup or other measures.</p>

\*If SSO database is not available fax required info to the appropriate RWQCB but enter info into online database as soon as practical.

### 6.1.1b Agencies Telephone/Fax Numbers

Agency	Contacts	Hours of Operation
County Health Department	(213) 974-1234	Answered on a 24-hour, 7-day basis
State Office of Emergency Services	1-800-852-7550	Answered on a 24-hour, 7-day basis
Los Angeles Regional Water Quality Control Board (Region 4)	(213) 576-6600 (213) 576-6650	Answered only during normal working hours
Flood Maintenance Division East area	(626) 445-7630  (626) 798-6761	Answered only during normal working hours
South area	(562) 861-0316	Answered only during normal working hours
West area	(818) 896-0594 (818) 248-3842	Answered only during normal working hours
State Water Resource Control Board	Online database website address	

- 6.1.2 Procedure to ensure that Staff and Contractors are Aware and are appropriately trained to follow Emergency Response Plan** - This is mainly the function of the County DPW. City staff however are familiar with the SMD Emergency procedures which is included in the SMD SSMP.
- 6.1.3 Procedure to Address Emergency Operations such as Crowd Control and other Necessary Response Activities** - The City does not play a significant role in this function. It is performed by County DPW Staff or Contractors doing emergency repair SSO related work for the County or the City. The County Fire and County Sheriff departments also play active roles in the control and protection of the general public during emergency SSO operations.
- 6.1.4 Program to Eliminate or Minimize the Discharge of SSO into waters of the United State** - This is one of the main functions performed by the County DPW for the City. The roles played by the City are limited to ensuring that the City's collection system has sufficient capacity for all operating conditions and making sure that the County DPW staff are promptly notified of SSO events when they do occur.

## **7.0 FOG CONTROL PROGRAM**

### **7.1 Public Education Outreach Program**

The City financially contributes to the County DPW Public Education Outreach Program. Under this program information on proper disposal of FOG and other SSO prevention measures such as the installation of backwater valves, house lateral maintenance etc. is disseminated to CSMD City residents through publication of Annual Reports, brochures and individual notices to property owners. County DPW Sewer Maintenance and Industrial Waste management program personnel also assist in passing useful information on SSO prevention and FOG on to home and business owners. County DPW, in addition, has the Annual Reports posted on its home web page (<http://dpw.lacounty.gov/smd/smd/>) for easy access to all.

To complement County efforts, the City will initiate its own Public Education Outreach Program. This will consist of including SSO and FOG related articles from County DPW and other sources in City newsletters and City webpage (<http://www.cityofsandimas.com/index.cfm>) and by maintaining continuous communication with the County, City residents and other stakeholders on these and other issues. City personnel also disseminate information to residents during meetings or while doing inspections for lateral work done in the right of way.

### **7.2 Disposal Methods for FOG Generated within the City's Sanitary Sewer System**

This function is performed by the CSMD staff on behalf of the City. The methods used by County DPW are contained in the SMD SSMP.

### **7.3 The Legal Authority to Prohibit Discharges to the System and Identify Measures to Prevent SSOs and Blockages Caused By Fog**

The legal authority to prohibit discharges of FOG into the sewer system is discussed in Chapter 3 of this document. Requirements for grease interceptors at food establishments to prevent the discharge of grease to the collection sewer system and educating the public on proper disposal methods for FOG are also discussed elsewhere in this chapter.

### **7.4 Requirement to Install Grease Removal Devices, Design Standards for Grease Removal Devices, Maintenance Requirements, BMP Requirements; Record Keeping and Reporting Requirements**

The County DPW, under a separate agreement (Appendix F) with the City, is charged with the responsibility of enforcing the County's Sanitary Sewers and Industrial Waste Ordinance in the City. The Industrial Waste Program of the County is managed by the Environmental Programs Division of County DPW. The design standards for grease removal devices and all the requirement imposed on industrial waste facilities that discharge waste or FOG into the City's sewer system are similar to those imposed in the Unincorporated County and as presented in Chapter 7.4 of the SMD SSMP.

## **7.5 Authority to Inspect Grease Producing Facilities, Enforce Authorities, and Evidence of Adequate Staffing To Inspect and Enforce the FOG Ordinance**

The LACO Code, Section 20.24.090, as adopted by the City, gives the City Director of Public Works the authority to inspect grease producing facilities for compliance with permit requirements. There are currently a total of 33 facilities holding Industrial Waste Permits in the City. In accordance with the aforementioned agreement, the County DPW is responsible for issuing the permits and for the inspection of these facilities for compliance with terms of their permit. County DPW in concert with the City Director of Public Works is also responsible for the enforcement of all industrial waste permit and Code violations in the City.

## **7.6 Cleaning Schedule for Identified FOG Prone Sewer Segments**

This function is performed by the CSMD for the City. The methods used by CSMD staff are described in the SMD SSMP.

## **8.0 SYSTEM EVALUATION AND CAPACITY ASSURANCE PLAN**

### **8.1 System Evaluation and Capacity Assurance**

The City is responsible for ensuring that the public sewer infrastructure is correctly designed, adequately sized and easily maintainable. New developments are required to provide capacity analyses reports prepared by licensed professionals. All sewer plans are designed by licensed professionals and are plan checked by the City and the County. The CSMD also provides a supporting role in reviewing all proposed sewer plans for new developments in the City to ensure that they conform to County design standards and particularly to ensure that district's requirements for acceptability for maintenance. Additionally, the City maintains a Master Sewer Plan that is updated periodically and is used to assess capacity analyses.

### **8.2 Adequate Capacity and Correct Design**

The Director of Public Works, and the City Engineer or hired qualified private company provides thorough review of all sewer plans for proposed development projects in the City to ensure that: 1) they are properly designed with sufficient capacity for current and future base, peak and wet weather flow demands; and 2) any impact of proposed project on existing sewer system is mitigated prior to being approved by the City Engineer. During construction, the projects are continuously inspected by the City Inspectors to ensure that the sewer facilities are constructed in accordance with the approved plans and specifications.

The City requires that new developments of substantial size provide documentation (sewer capacity study) to ensure that there is adequate capacity in the existing sewer system to handle the discharge from the new development. This sewer capacity study is required to be prepared by a licensed engineer.

Additionally the City will periodically update its Sewer Master Plan which analyzes the existing capacity of the system. The Sewer Master Plan is budgeted for updating in the FY 2009-2010.

### **8.3 Capacity Enhancement Plan**

The collection sewer system capacity enhancement program is a combined effort of City and County DPW. The CSMD programs to optimize the use of available sewer capacity and preventing SSO include the CCTV program to identify pipe segments needing repairs or with I/I or tree root intrusion problems, sewer cleaning program and the ACO program to effect repairs or replacement of damaged pipes. These programs are described in Chapters 3 and 4 of the SMD SSMP. The City's plan to complement County's efforts is through its Capital Improvement Program. Pipe segments identified to be deficient, through city sewer capacity study, will be prioritize for orderly upgrade utilizing city's sewer funds.

## **9.0 MONITORING, MEASUREMENT, MODIFICATION PROGRAM**

### **9.1 Monitoring**

The City will document all relevant data on SSOs that occurred in the City. These will include the quarterly SSO reports from County DPW, Annual Reports publish by County DPW, Sewer Maintenance Productivity Report (Appendix G) for the City and any special reports to regulatory agencies etc. The data will be analyzed to evaluate the effectiveness of the City's SSMP.

### **9.2 SSMP Program Effectiveness Evaluation**

The evaluation of the City's SSMP Program Effectiveness shall be based on such key performance indicators (Appendix H) as the total number of overflows, overflow response time, reduction in repeated incidents of SSO at some location, total overflow equal to or greater than 1,000 gallons or reaching the waters of the United States and reduction in number of overflows that are caused by sewer capacity-related problems.

### **9.3 Program Modification**

The City shall continually update or modify the key elements of its SSMP based on the results of the above mentioned monitoring and program effectiveness evaluations. The City shall also make recommendations to the County, as necessary, on elements of the SMD SSMP to be adjusted or revised within the City boundaries to better serve its residents.

### **9.4 SSO Location Mapping and Trends**

The annual SSO location maps prepared by County DPW are enclosed in Appendix I. The caused of each SSO incident is also recorded and shown on the map sheets. These maps are used for establishing SSOs pattern, identifying hot spots and for work assignment scheduling by County DPW field personnel.

#### **9.4.1 Location Map**

**9.4.2 Mapping of SSO Frequencies** - The monthly numbers of SSOs charts and graphs prepared by County DPW are presented in Appendix J. The graphs are used for identifying SSO trends and to evaluate overall program effectiveness. The charts are used to identify SSO trends and as an indicator of possible Infiltration/Inflow problem.

## **10.0 SSMP PROGRAM AUDIT AND CERTIFICATION**

### **10.1 SSMP Program Audit**

The City shall conduct an internal audit and prepare a report every two years. The audit shall focus on evaluating the effectiveness of the SSMP and records of City and SMD's compliance actions during the audit period. The most recent report of the audit must be kept on file in the City's Director of Public Works office.

### **10.2 SSMP Certification**

The SSMP shall be certified by the City Director of Public Works or authorized representatives to be in compliance with the requirements set forth in the WDR's and be presented to the City Council for approval at a public meeting. The City authorized representative must also complete the certification portion in the Online SSO Database Questionnaire (<http://ciwqs.waterboards.ca.gov/>) by checking the appropriate milestone box, printing and signing the automated form and sending the signed form to

State Water Resources Control Board  
Division of Water Quality  
Attn: SSO Program Manager  
P.O. Box 100  
Sacramento, CA 95812

### **10.3 SSMP Modification and Re-certification**

The SSMP must be updated every five years to keep it current. When significant amendments are made to any portion or portions of the SSMP, it must be resubmitted to the City Council for approval and re-certification. The re-certification shall be in accordance with the certification process described in Section 10.2 above.

## **11.0 COMMUNICATION AND SSMP AVAILABILITY**

### **11.1 Communication**

The City shall provide all stakeholders and interested parties such as the general public and other agencies, with status updates on the development and implementation of the SSMP and consider comments made by them. The City shall utilize media such as letters, newsletters, brochures, notices in newspapers, and the City's home web page for conveying this information.

### **11.2 SSMP Availability**

Copies of the SSMP will be maintained in the City's Director of Public Works Office and posted in the City's home web page. The document shall also be made readily available to the Regional Water Quality Control Board (Regions 4) upon request and to the operators of any collection system or treatment facility downstream of the City's system.

## **12.0 CSMD AND CITY RESPONSIBILITIES UNDER THE WDR**

### **12.1 CSMD Versus City Responsibilities**

The CSMD and the City which is a part of the CSMD will play significant roles, jointly and separately, towards attaining the goals of the WDRs. LAC DPW shall apply for coverage under the WDR for facilities it owns. The City will apply for coverage for its own facilities.

LAC DPW shall prepare a comprehensive SSMP for the SMD. The City with coordination with LAC DPW, will prepare its own SSMP. The City has previously adopted Codes and regulations providing it with the legal authority in conjunction with agreements with the SMD to enforce items stipulated in the WDR's.

Section 12.2 shows the CSMD Cities including the City of San Dimas and the SSO related services currently provided by LAC DPW to each of the cities. It also contains information on estimated population of the cities. The CSMD shall perform all functions under the WDRs related to the operation and maintenance program. CSMD shall also be responsible for conducting structural deficiencies under the ACO program. Cities will be conducting the capacity study of their collection systems, if necessary, and correcting identified hydraulic deficiencies. The matrix on section 12.3 is a listing of the Key elements of the SSMP and the roles for the CSMD and the City. By completing and signing this matrix, the city, as owner, and the CSMD, as service provider, mutually agree that it is an accurate description of what each entity will be responsible for under the WDRs. Upon approval by both parties, this document becomes a part of the City's and SMD SSMP.

12.2 County of Los Angeles Department of Public Works
